EDUCATION

Bachelor of Technology in Computer Science and Engineering 2022 - present
Graphic Era University, Dehradun 8.8/10 CGPA

ISC 2021 - 2022
Raja Ram Mohan Roy Academy, Clement Town 89.6%

VIRTUAL PROGRAMS AND INTERNSHIPS

Salesforce Developer Virtual Internship | *Salesforce, Apex, LWC* May 2025 – July 2025
• Studied process automation, security, Apex, and Lightning Web Components via Salesforce Trailhead. Earned Super Badges in **Apex Specialist**, **Process Automation Specialist**, and **Developer Super Set**.

PROJECTS

Detection of Plant Diseases | *Python, CNN, Streamlit, Deep Learning* — [🔗](#) Dec, 2023
• Developed a CNN-based classification model for plant diseases across **10 different categories**.
• Trained on a dataset of **80,000+ images** using 4 convolutional layers and ReLU activation.
• Achieved **90.5% accuracy**, reducing validation loss by **25% in 10 epochs**.
• Deployed a Streamlit-based UI for real-time disease prediction with sub-2s response time.

Vision-Based ASL Recognition System | *Python, OpenCV, CNN, Deep Learning* — [🔗](#) Feb, 2024
• Built a real-time American Sign Language (ASL) to text converter using a custom CNN model.
• Generated a dataset of **16,000+ images** with hand-segmented preprocessing for accuracy.
• Achieved over **95% classification accuracy** using dual CNN architecture and Adam optimizer.
• Tested model under varied lighting and background conditions for robustness.

Multithreaded File Transfer System | *C, TCP Sockets, OpenSSL, Pthreads* — [🔗](#) April, 2025 - May, 2025
• Built a secure client-server file transfer application using **TCP sockets** and multithreading.
• Enabled concurrent file uploads/downloads using **pthreads** for high-speed transfers.
• Integrated **SHA-256 checksum** verification using OpenSSL to ensure file integrity.
• Handled segmented transfers with optimized I/O operations for improved performance.

Parser Visualizer for LL(1) and CLR(1) Parsers | *Python, Flask, Compiler Design* — [🔗](#) May, 2025
• Developed a parser visualizer to simulate both LL(1) and CLR(1) parsing for user-defined grammars.
• Implemented automatic computation and display of FIRST/FOLLOW sets, parse tables, and derivation steps.
• Used a Flask-based Python backend to process grammars and deliver structured outputs via APIs.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, JavaScript, SQL

Tools & Platforms: Git, GitHub, Firebase, Linux

Technologies/Frameworks: HTML5, CSS3, Reactjs, NodeJS, Expressjs, MongoDB, Tailwind CSS, Docker, MySQL, Flask

Machine Learning: OpenCV, Tensorflow, Scikit-learn, CNN, streamlit.

COURSEWORK

- Data Structures and Algorithms
- Database Management Systems
- Object-Oriented Programming
- Machine Learning
- Software Engineering
- Operating Systems

CODING PROFILES

- Solved **400+** problems on **Leetcode**. [🔗](#)

EXTRACURRICULAR

- Finalist in the **Smart India Hackathon (SIH) 2024**, showcasing technical expertise and innovative problem-solving.
